2007

Axis:

Was honored with 3 awards, Two Gold and One Silver, at Neocon in Chicago, the most prestigious Office Design Show in the US.

A Dramatic Architectural System in Glass and Steel with accent elements in Wood and Aluminum. This flexible system can be customized for a variety of design needs and environments.

The aesthetic approach is a minimalistic streamlined industrial motif that offers cohesive, unifying design elements.

Axis Design

Axis Flooring

Axis Furniture

Axis Interior Walls

Axis Interior Walls

Divide or enclose space with Floor-to-Ceiling walls. The Core Elements -Glass, Steel, Aluminum, Wood - can be combined in varying ways for ultimate choice. Faceted, curved, straight, clear, opaque.

Functionality, Flexibility, Quality, Innovation ...

Private Office fronts mounted on drywall with barn doors minimizes square footage requirements

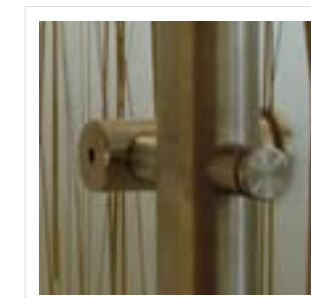

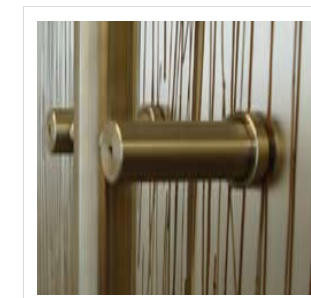

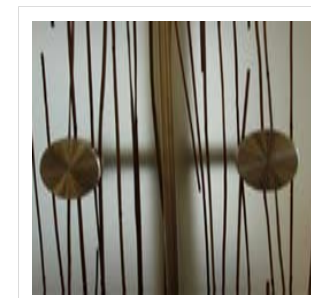

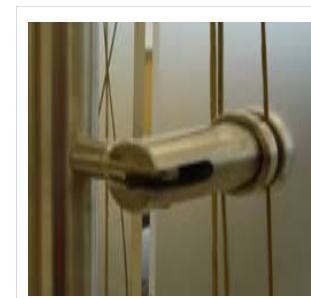

Curved Wall Application With Treated Glass

Sliding barn door mechanism

Axis Design

A striking, highly flexible solution, with contemporary, streamlined looks that can be customized for a variety of design environments. Wood and Glass come together to offer a striking design statement. 100% reconfigurable.

Axis Flooring

Axis Flooring offers a Fully-Engineered aesthetic solution, strong enough for High Traffic areas.

Laminated Glass brings the outside in.

Reveal, Open, Explore.

Sand and rock bring earthy elements into a high-tech environment

Axis Furniture

Dramatic Stainless Steel and Glass.
Dynamic horizontal and vertical curves are the perfect solution for your public areas.

Axis, Custom Design

Imagine the endless possibilities....

Axis was honored with 3 awards, Two Gold and One Silver, at NeoCon in Chicago, the most prestigious Office Design Show in the US.

Functionality

Integrating cantilevers and legs into the existing elements creates free standing reception stations and conference tables/credenzas that incorporate the architectural features of Axis. The addition of veneer/aluminum slatwall creates design versatility.

Flexibility

The positive response to Axis from the design community and feedback from end-users, inspired Riviera to expand on the original features to create a wider range of applications using the same basic elements.

With the simple addition of cantilevers and legs Axis adds free standing capability, broadening the usage options.

Environmental Sustainability

Post lifecycle 100% recyclable materials (glass, steel and aluminum).

Aesthetics / Style

Minimalistic, streamlined, industrial motif. Glass panels can be customized to conform with the design environment. Combining curving glass panels, structures and worksurfaces with wood elements creates a flowing, open and warm atmosphere. The introduction of aluminum slatwall in conjunction with the existing vertical and horizontal elements creates a dynamic contrast.

Innovation

The addition of the integrated freestanding furniture elements creates a cohesive design statement where the freestanding furniture becomes a harmonious part of the designed environment. The introduction of the veneer/aluminum slatwall allows for greater design options.

Quality / Durability

Hardware, including connecting rods and fasteners of stainless steel for strength and resistance. Drilling and polishing of the glass panes are in-house CNC machinery for precision. Integrating Riviera strengths introduces a high-quality durable design.
